

SOURCE' s Partner of the Month – Jan 2015

Name of Organization: The Men in Nursing Club

Mission: To organize and execute monthly group volunteer projects in the community for JHUSON students. We all have such a short time in school and its tough to spend time together, so we are all about bonding through service.

Programs and Services: We partner with local organizations and bring man (and woman) power to one-time large scale service projects.

Inspiration: Its all about showing up and putting in the work, its good for you to just get out there, turn off your brain, and just do the work.

Greatest Asset: The generosity of Hopkins nursing students and the organizational connections through SOURCE.

Biggest Challenge: Getting the word out that we are not a “Boys” club, despite our name, but we are an all inclusive service organization. We'll set up the project, you just need to show up with a good attitude.

Involvement Opportunities: We need help for our January project , a Bone Marrow Registration Drive on the 26th. Future events are in development.

Volunteer and Work Opportunities: Shoot me an email, and I'll find something for you. We're pretty casual, just show up and we'll put you to work.
