

SOURCE's Partner of the Month – June 2014

Name of Organization: Baltimore Medical System

Mission: Baltimore Medical System is deeply committed to improving health, wellness and the quality of life in the communities we serve by providing safe, high quality, accessible and affordable health care.

Programs and Services: Primary Care, Behavioral Health and OB/Gyn care, as well as support programs for those with chronic illness. We are actively involved in B'more for Healthy Babies, the city-wide initiative to reduce infant mortality.

Inspiration: "One of the basic components of culturally competent care means that we treat all of our patients with respect, be they from Highlandtown or Haiti, Belair-Edison or Burundi."

Greatest Asset: We have a diverse and committed staff who desire to care for the very diverse populations we serve.

Biggest Challenge: As a Federally Qualified Health Center, we seek to provide a patient-centered medical home for those we serve, but continue to seek opportunities to make specialty care available to those who have no or limited insurance coverage.

Involvement Opportunities: We welcome student participation in on-going projects, such as B'more for Healthy Babies, as well as opportunities to assist in information gathering and data analysis for projects identified by clinical leadership.

Volunteer and Work Opportunities: There are varied opportunities, often more in support of our community education programs, although special projects do seek student support. We welcome health care professionals interested in working in community health with diverse populations.
